ARBITRAGE	75	20.0%	$-16.66

Risk Metrics

Max Drawdown	17.2%
Daily Loss Events	1
Cooldown Triggers	1

Conclusion & Recommendations

The backtest analyzed 292 trades across 4 time periods (24h to 28d) using real BTC/USDT market data from Binance. Overall Performance: - Combined P&L;: $-185.49 - Starting Balance: $1000.00 - Ending Balance: $814.51 Key Observations: - VPIN Cascade strategy triggered on high volume imbalance (VPIN >= 0.55) - VPIN Informed strategy captured moderate imbalances (VPIN >= 0.45) - Arbitrage opportunities were simulated at ~40 minute intervals - Risk management: 45% max drawdown kill, 10% daily loss limit Recommendations: - Monitor actual VPIN threshold effectiveness in live trading - Consider adjusting bet fractions based on strategy performance - Track real arbitrage opportunities vs simulated rates - Implement proper slippage and fee calculations for production
